A final-year Computer Science student at Parul University, specializes in Full Stack web development (MERN). I am committed to leveraging my technical skills to contribute to innovative IT projects while continuously learning and adapting to emerging technologies. I aim to thrive in dynamic environments that foster creativity and collaboration, driving impactful results in the tech industry.

PROJECTS

🔗 CYCLEEASE | 01 OCT, 2024 - 01 DEC, 2024

CycleEase is a period tracking app that simplifies menstrual health management. It predicts cycles based on past data, offers personalized diet plans and health tips, and provides detailed analytics to help users understand their patterns. With an intuitive interface, CycleEase empowers women of all ages to manage their menstrual health effectively.

🔗 PERSONAL PORTFOLIO | 01 OCT, 2024 - 01 DEC, 2024

I built a responsive portfolio using React, JavaScript, HTML, and CSS to showcase my achievements, skills, academic background, and projects. Designed for a clean, user-friendly experience with smooth navigation, it's hosted on Vercel for fast performance and global accessibility, making it easy for employers and collaborators to explore my work.

🔗 WORD-MASTERMIND | 01 OCT, 2024 - 30 NOV, 2024

Word Mastermind is a word-guessing game where players deduce a hidden word. Correctly placed letters turn green, misplaced ones yellow, and unmatched letters remain unmarked. All guesses must be valid words, with an on-screen keyboard updating letter statuses dynamically.

SKILLS

Programming Language	: JavaScript, Java
Runtime Environment	: Node.js
DBMS	: MySQL, MongoDB, PostgreSQL
Source Control	: Git
Frameworks	: Express.js, React
Web Technology	: JQuery, HTML, CSS, Bootstrap
Virtualization	: Docker, VirtualBox, VMWare
Operating System	: Windows, MacOS
IDE	: IntelliJ IDEA, VS Code
Tools	: GitHub, Postman
Other Skills	: Data Structure, Algorithm
